Projects

Socialwifi

Socialwifi is a technology that allows a business to turn their free Wifi into a social marketing device connecting them to their customers on auto pilot. Social WiFi opens the channels to leveraging the growing social media networks. Due to increased customer engagement, ease of use for the customer and the collection of useful customer's data, business should also see an increase in sales. Finally, collecting customers' emails and having these automatically added to mailing list means we've opened up an ongoing communication channel with our customers.

Technologies used: Laravel , JQuery, Ajax, MySQL

Responsibilities:

- Design and coding of User panel and admin panel.
- Testing of all module.
- Create API for mobile Apps.
- Support and maintenance.

Propertize.in

Propertize.in is an online platform that features property for rent and sale. This platform will manage multiple levels of users from property owners, brokers, property managers and service providers.

Technologies used: Core PHP, Javascript, JQuery, Ajax, MySQL

Responsibilities:

- Developing user panel and admin panel.
- Testing of all module.
- Create API for mobile Apps.
- Support and maintenance for the website and mobile apps.

Property Console

Property Console is an online Property Management Software. Users can access and update their property management data. The users of this system are Property Managers. Property Console has a fully secure, accredited trust accounting module. It keeps track of rental property income & expenses. It has an automate rent reminders and receipts to user's tenants.

Technologies used: : Core PHP, JavaScript, JQuery, Ajax, AngularJS, MySQL

Responsibilities

- Developing Agent Panel, Landlord Panel and Admin panel
- Designing database structure
- Testing of all modules
